Box
No 12
Ornithology.
Dept.

Ridgway
18. June
1840

This Box contained another of Tin which although well soldered up has recently been opened since its arrival in the U.S. States as there newspapers in it of a date as late as March 1840.

Contents

Birds & Animals Insects &c from New Holland. There were few labels on any of the Specimens, from what few there were, this is said to be the abstractus of some of the original contents of the Box for instance One Label called "two Palms Birds male & female;" when there was but one, and another label for them male at the same time when there was but two. There was also female ? Mountain Pheasant but no male.

Insects had made serious incisions into many of the Specimens and generally the Skins are badly put up.

Box No 18
